

TRACK BIAS

Race tracks play differently every day due to weather, track maintenance, etc. Sometimes the track seems to favor no particular running style and no part of the track seems better than another. That's not always the case, though, and trip handicappers have long made their money by noting whether the track favored one type of running style or another and then following the horses that ran 'against the bias'. We divide track bias into two types on the main track. There are running style biases in which either horses with speed, we call them Front Runners in this table, or no early speed, Late Runners, have an advantage. There are also days when the rail is better than the outside and vice versa. These biases run from moderate to strong to dominant. We will code the biases as follows: 1= Moderate, 2= Strong, 3 = Dominant. The strong and dominant biases deserve the most attention. In turf racing, we report the position of the auxiliary rails, as the position of the temporary rails can affect which running styles win. Watch for our **new track profile by position of the rail**. It's in the Digest most everyday now.

Date & Track	Race Type	Running Style	Inside/ Outside	Date & Track	Race Type	Running Style	Inside/ Outside
